Understanding biology

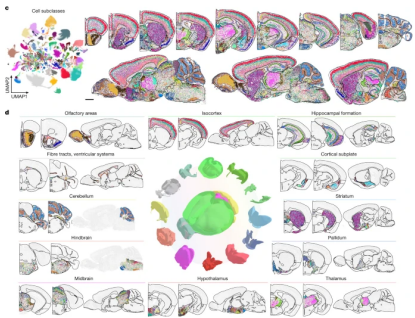

"Imagine a flashy spaceship lands in your backyard. The door opens and you are invited to investigate everything to see what you can learn. The technology is clearly millions of years beyond what we can make. This is biology. That's why it fascinates me so much. Life is billions of years old technology, and we can explore it to see how it works!"

Large-scale genomic measurements

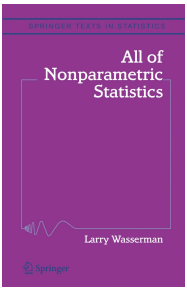

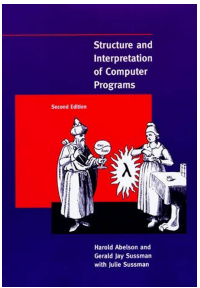

1. Know what analyses are possible
2. Answer common questions
3. Answer uncommon questions
4. Pose new questions
5. Devise new analytical procedures

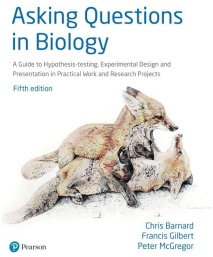

MOLECULAR BIOLOGY OF THE GENE
SEVENTH EDITION
